

STATEMENT OF WORK (SOW)

Project Title: Airo-Aether Digital notice board system

Date: 07/02/2026

Prepared By: GROUP-18

1. Introduction

To build and design a digital notice board system that allows authorized personnel to post updates and announcements digitally.

Moreover, this system is **event-adaptive** that is - it supports all the events that take place in Mahindra University including the two major events – **Airo** (sport fest) and **Aether** (cultural fest) by displaying live sports events updates during **Airo** and also provide dress themes and screening announcements during **Aether**.

2. Scope of Work

Project Description: To build and design a digital notice board system that is event-adaptive and allows authorized personnel to post updates and announcements digitally.

Objectives:

- To design and develop an **event-adaptive digital notice board** that automatically adapts its content based on the ongoing university events such as **Airo (Sports Fest)** and **Aether (Cultural Fest)**
- To automatically **switch** display modes and layouts according to the current event/context without requiring manual change.
- To keep students updated by presenting relevant information at the right time and place.

Key Activities:

- **Identify event/context:** Switching between different system contexts such as **Airo** and **Aether**

- **Designing the system:** Designing the overall architecture of the system – frontend (React.js) , backend (Node.js) , database (Firebase) and also the logic for switching between events/contexts in the system.
- **Defining method for event/context switching:** Implementing set of rules based on event, date and time to determine the content that has to be displayed on the notice board.
- **Automation:** Implement automated event/context switching based on schedules defined.

3. Deliverables

List the tangible and intangible outputs of the project.

- **Deliverable 1:** Define Requirements – functional/non-functional and system context [Airo/Aether or default mode].
Due-date: 18/02/2026
- **Deliverable 2:** [Description and due date]
- **Deliverable 3:** [Description and due date]

4. Timeline and Milestones

Provide a high-level timeline with key milestones.

Milestone	Description	Due Date
Project Kickoff	Initial project meeting	16/02/2026
Phase 1 Completion	[Description]	[Insert Date]
Final Delivery	Submission of all deliverables	[Insert Date]

5. Roles and Responsibilities

Outline the key roles and their responsibilities within the project.

- ~~**Project Manager:** [Name] – [Responsibilities]~~
- **Team Members:**
 - Ankit – Team Lead (Overall project planning and scheduling)
 - Anuj – Backend Developer (Designing and implementing REST APIs using Node.js)
 - Harshith – Database Designer (designing database and Implementing PostgreSQL queries)

- Akshay – Firebase Developer (Integrating Firebase for real-time data synchronization)
- Abhinav – Frontend Developer (Designing and developing the user interface for notice display)
- Aryan – Tester (Identifying and documenting defects)
- Gynanesh – Documentation (Maintaining version control and final submission)

- **Client Contact:** Software Engineering course, Mahindra University

6. Budget and Payment Terms (For now you can ignore this)

Detail the project budget, including payment schedules, terms, and conditions.

- ~~**Total Budget:**~~ [Insert Amount]
- ~~**Payment Schedule:**~~ [Insert payment milestones and dates]
- ~~**Terms:**~~ [Insert any special payment terms]

7. Assumptions and Constraints

List any assumptions and constraints that may impact the project.

- **Assumptions:** [E.g., Availability of key resources]
- **Constraints:** [E.g., Regulatory limitations, deadlines]

8. Approval Signatures
